

RCA Exec Agenda actions from the RCA Forum 27 April 2007

Overdimension website proposal

Feedback was requested on the points listed below and discussion resulted in:

1. Do RCAs want to view load notifications in advance?

Yes. But not to vet or approve permits. Just to view them. The data would have to be zoned for easy viewing.

2. Do RCAs think they would gain valuable information on asset damage post-movement from the proposed archive of loads moved?

Yes.

3. Would RCAs be able to plan for better use of heavy haul routes?

Yes. There need to be maps of such routes with overdimension restrictions marked.

4. Do RCAs wish to provide information on road works on heavy haul routes?

Yes. This needs to be added to the maps.

Additional comments from A. Wilson, NPDC "RCAF needs to consider a bigger issue i.e. use of geospatial technology to protect infrastructure."

Action – the Exec to consider the above, scope the project and come back to the August Forum

Stormwater

The future work programme:

1. Further research/data gathering into practical applications that reflect industry needs and what devices work best and are most cost effective
2. Further workshops in additional (smaller) locations to disseminate above
3. Further liaison with MFE and MoT

Graeme asked for the Exec to:

- Ratify the nomination of new members – Russell Hawkes Southland DC and John Oldfield, Porirua DC
- Approve the work programme

Action: the Exec to ratify nominations and approve the work programme at the Exec meeting in June

NZUAG –Phil Consedine – finance and reps see PPT and meeting notes

Neil put forward a four-stage proposal for the first review of CoPTTM Local Roads with an estimated budget of \$40,000.

Action – Neil to survey members as to whether they want a review
